

Making real change

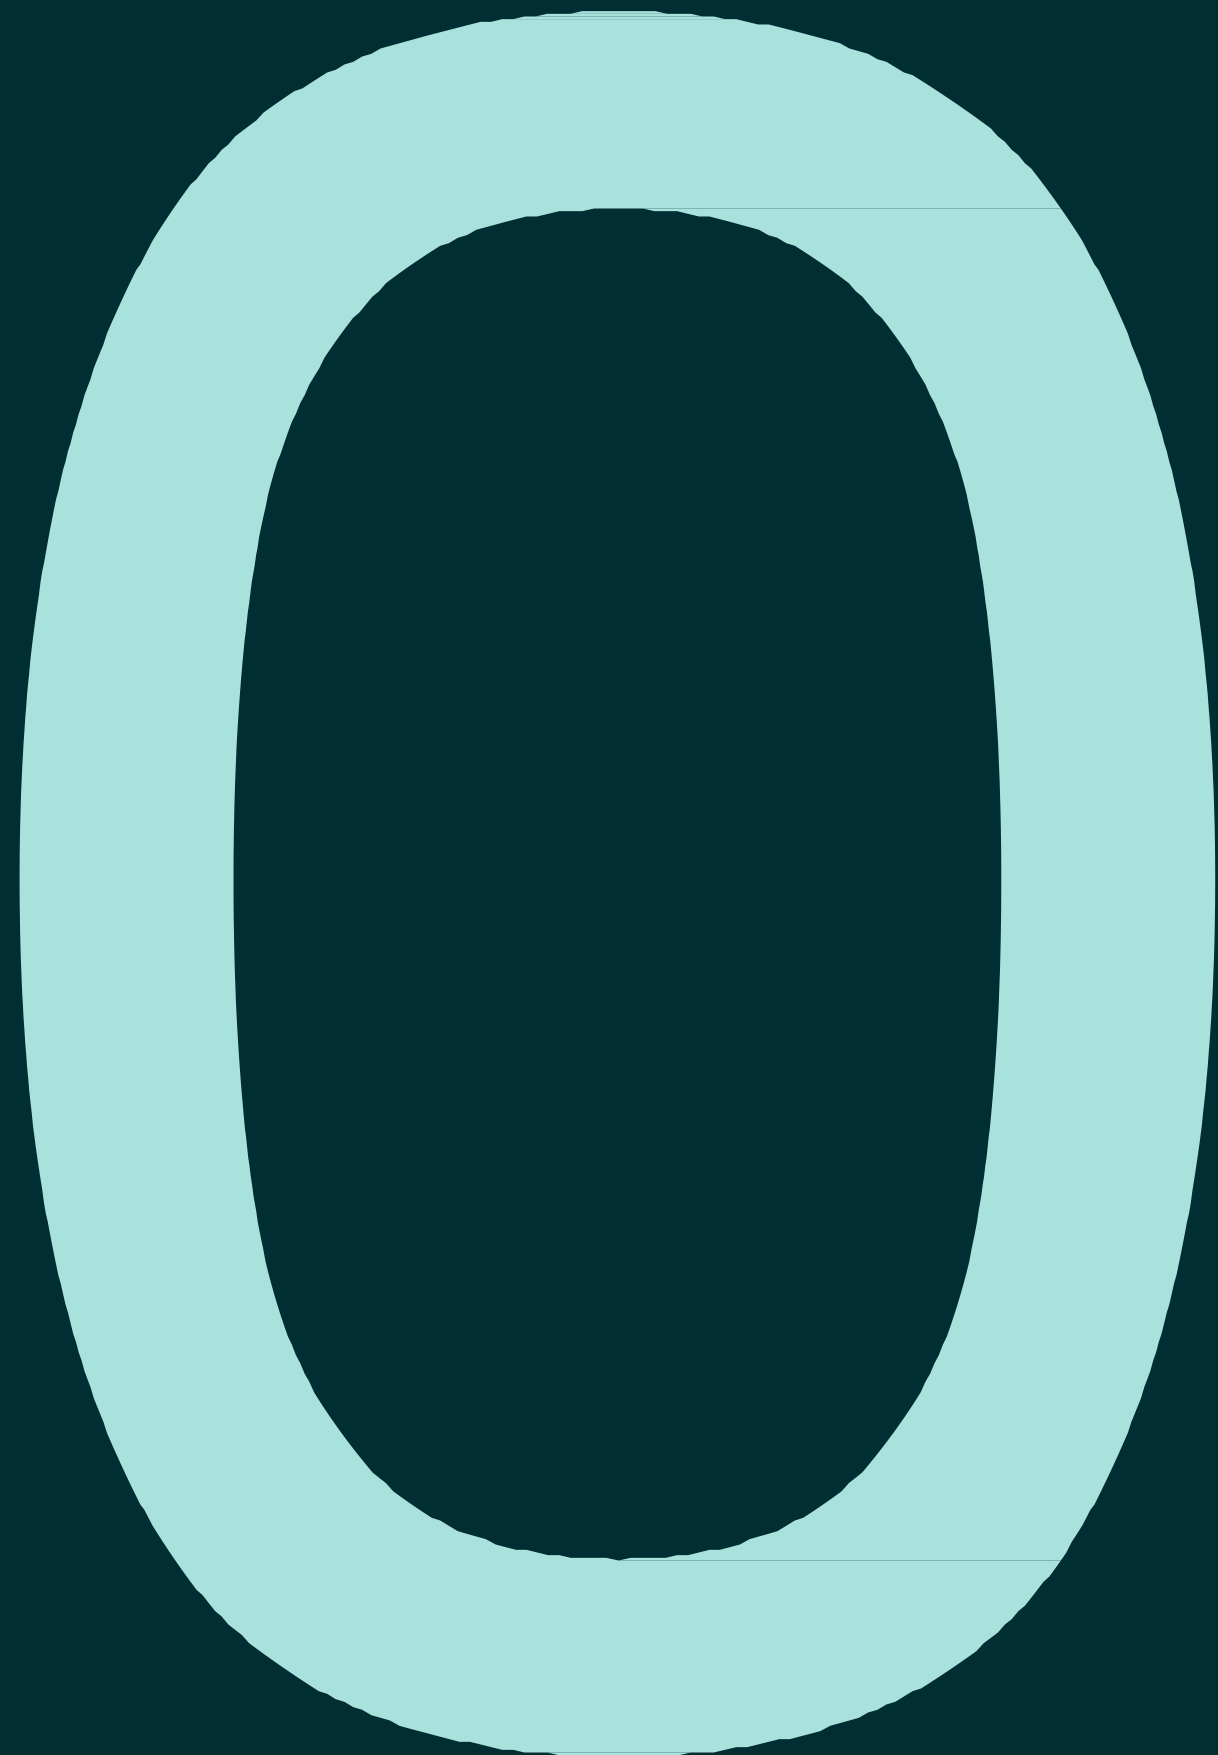

Presented to:

Bridger Carr Architects

Welcome to the
Carbon Neutral Group

The Zero Carbon Age is here

On 12 June 2019, the UK Government amended the Climate Change Act to introduce a target for at least a 100% reduction of greenhouse gas emissions in the UK by 2050.

The zero carbon age

As the engine room of our economy, it's businesses' responsibility to support this target and make real change for our people and planet

Carbon Neutral: Set the Example

A carbon neutral strategy has become not just good practice – it’s business critical. We can help you navigate this complicated landscape and achieve net zero with a long-term strategy that is:

Tailored

Practical

Sustainable

Realistic

Achievable

Get on board now, and be a
pioneer, not a follower

Make real change for
tomorrow, today

Introducing Carbon Neutral Group

Carbon neutral, net zero, Corporate Social Responsibility – all important aspects of how businesses operate in our acutely environmentally conscious age. And our mission is to cut through the jargon and make it simple.

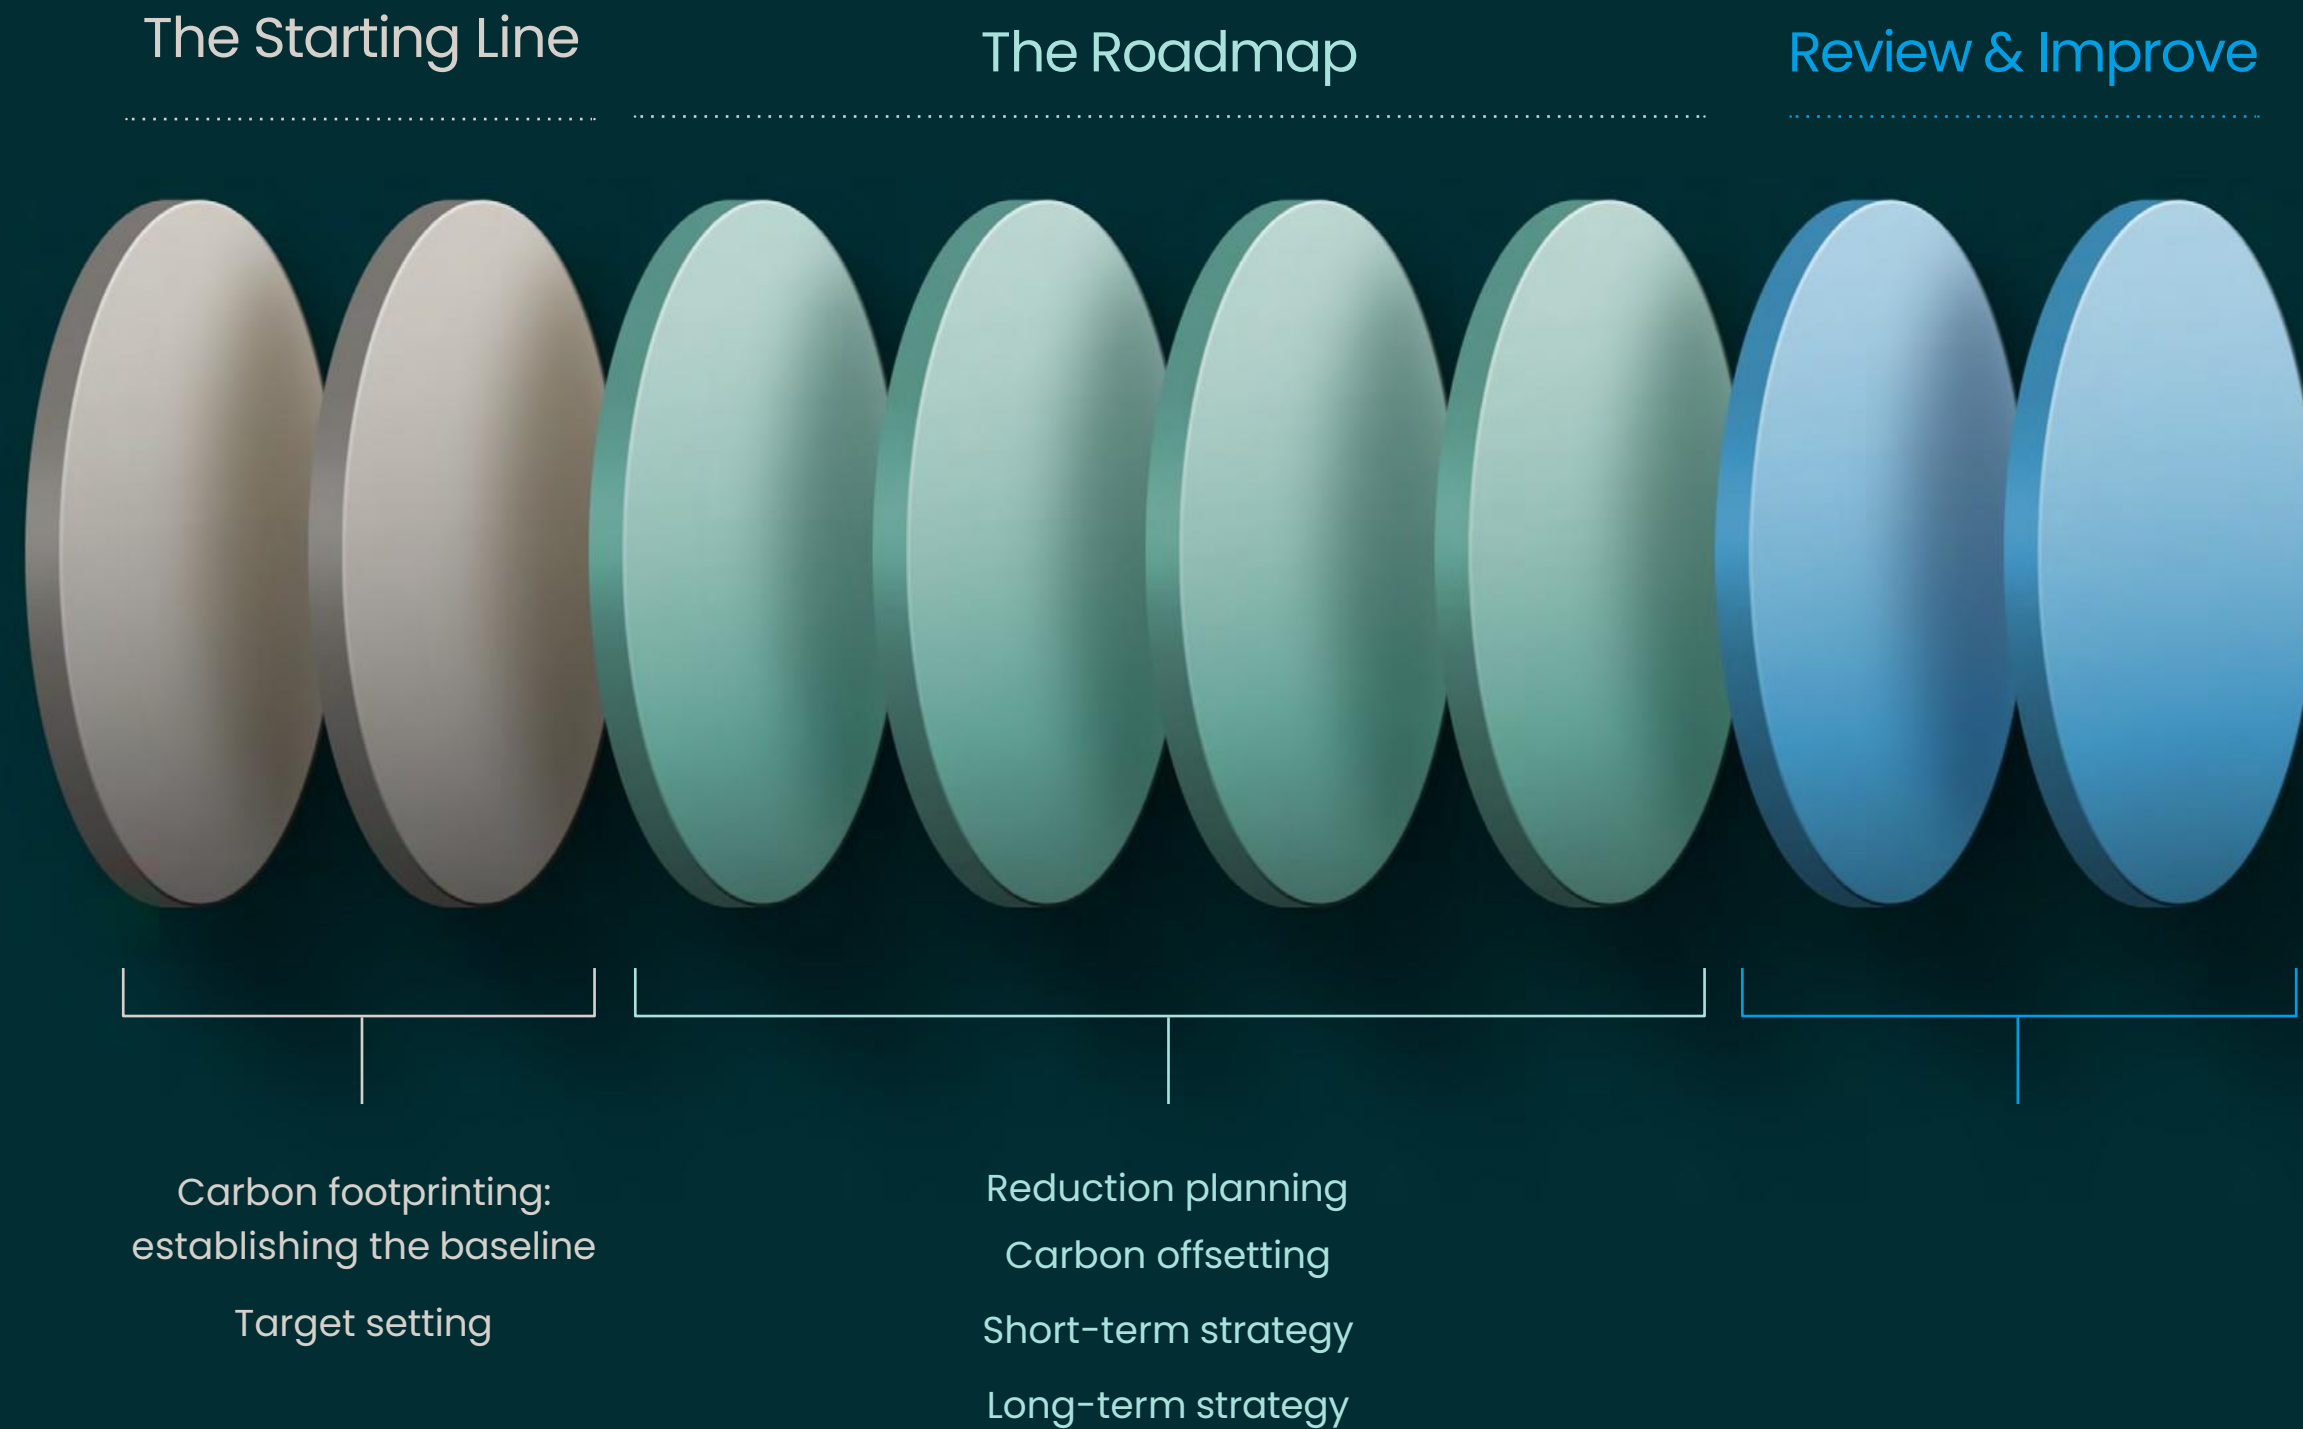

Introducing Carbon Neutral
Group

We don't believe in greenwashing
and empty gestures.

We do believe in partnership, action, and long term
results. Which is why we focus on data, technology and
a nuanced approach to carbon impact management.

Transform your environmental impact and deliver
business value with the CNG Approach.

The CNG Approach

How We Do It

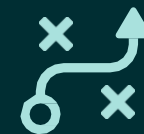

Data

Establish clear data points within your organisation to measure Impact. Developing world class advice on data capture enhancements to streamline processes and automate data capture into our data engine.

Assessment

Utilising your data, and our access to global industry standards and trends, we assesses and develop your Carbon Footprint baseline and report your scope 1,2 & 3 emissions.

Strategy

Develop carbon reduction strategies. Set realistic manageable roadmaps to reduce your environmental impact whilst setting and agreeing organisationally aligned objectives and key results.

Delivery

Underpinned by our data engine, we develop unique reports to your organisational requirements to support your delivery. Track your organisational performance, rank your suppliers on their progress to.

How We Do It

Balance

We have access to certified Carbon Credits that deliver against the UN sustainability Goals. We provision and retire credits to balance your Carbon Impact

Reporting

Assess your readiness for mandatory reporting requirements. Supporting you on your journey to prepare are disclosures aligned to your required reporting cycle.

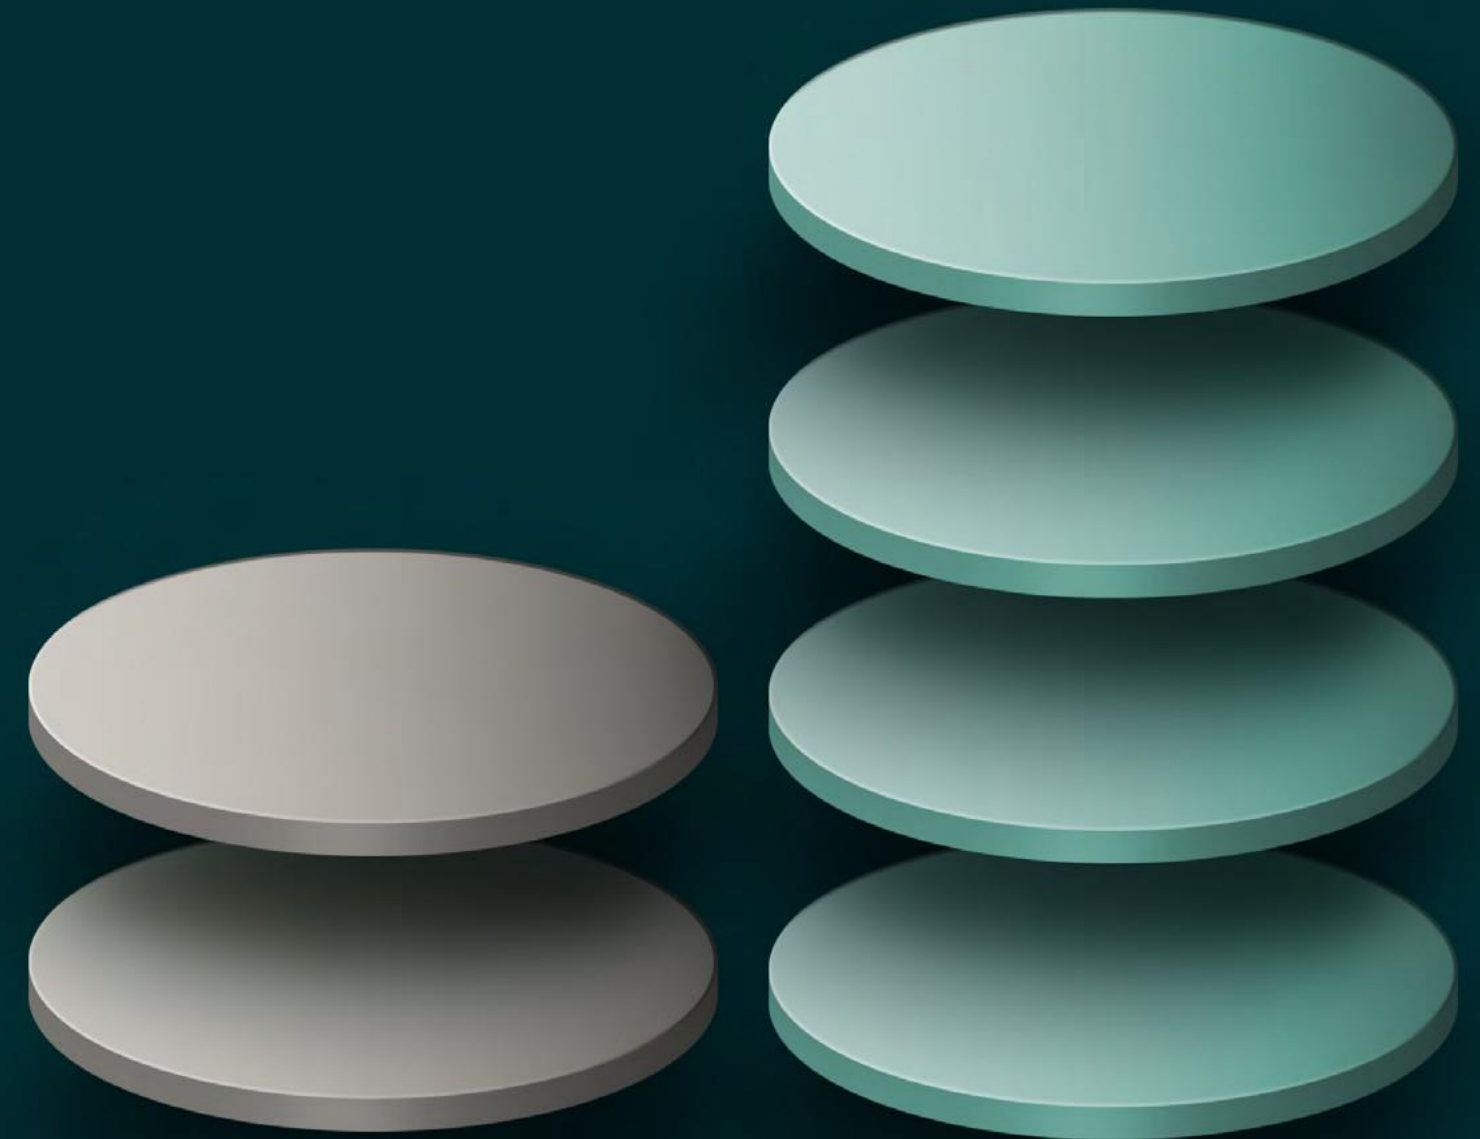

Dashboards

From the analysis of your data we can create Dashboards that show your data both current and historical. We can use them to map trends, show results from carbon reduction strategies and show your overall carbon footprint.

The Results?

- ✓ A tailored plan to achieve your sustainability, cost saving and commercial targets
- ✓ Marketing pack to start promoting your carbon neutral campaign to your partners, supply chain and customers
- ✓ A multi-faceted, long-term strategy for achieving net zero in a realistic timeframe
- ✓ Certification of Carbon offsetting endorsed by the United Nations

Bridger Carr Architecture – Carbon Report

Carbon Neutral Group has the pleasure in presenting our Carbon Footprint baseline Report to the team at Bridger Carr Architecture (Bridger Carr) . This report forms a key part of our communication strategy with you, a strategy which is designed to promote effective two-way communication throughout the baseline process with those charged with governance and ESG reporting.

The report covers the emissions for Scope one and two for the business. The report highlights and breaks down each emission area with the corresponding carbon footprint. The report has used data provided by Bridger Carr from 2019 through to 2022.

The measuring & reporting approach that has been taken by Carbon Neutral Group has followed guidelines provided by the UK Government GHG Conversion Factors for Company Reporting, the Department for the Environment, Food & Rural affairs as well the Department for Business, Energy & Industrial Strategy.

Emissions are reported in tonnes of CO2 equivalents (CO2e).

Carbon Footprint Report

From the data collected and the corresponding calculations for the Scope 1 & 2 emissions, the carbon footprint for over the time period in question does not exceed 1.1 tonnes of CO2e. The report highlights the main emission areas, electricity and gas.

The calculations for the emissions are based on those that were provided by the property landlord on behalf of Bridger Carr, and were completed using the approved GHG methodology.

The electricity emission calculations are based KHW for each of the years that are in scope and that years emission factor. All electricity that has been consumed was via the National Grid.

The gas and the gas calculations are based on the ‘Natural Gas’ Data in the GHG database and the consumption via Bridger Carr.

The office waste is minimal and what is created is 100% recycled.

Factors that have not been included in the report are;

- Company owned vehicles
- Refrigeration i.e. air conditioning.

Neither the company vehicles or air condition are in use at the business.

	Years in Scope			
	2019	2020	2021	2022
Electricity	0.47	0.23	0.28	0.22
Gas	N/A	0.80	0.81	0.69
Waste	0.00	0.00	0.00	0.00
Total Footprint (C02e)	0.47	1.03	1.09	0.91

The

For your business
For your people
For our planet
And make real change

now.
